This Mod Comes Using Truly Amazing Features So Only Download The Mod By After Above Procedure & Enjoy. Join Us on Telegram Group Follow Me on Instagram Ads The super simple ASUS launcher Directly run your most-used apps Customize your sidebar with your favorite apps Add round corners to your Android device's screen Create your own custom widgets Dozens of kawaii-style wallpapers Customize your Android buttons Customize your device however you want with this launcher Updated on August 24, 2022 App Name AOA Genre Tools Size 15.22MB Latest Version 3.4.1 MOD Info Pro Unlocked Get it On Download APK (15.22MB) Explore this article Edge Lighting is a feature that can only be seen on Samsung high-end devices but rarely seen by other devices. Even Samsung devices are not sure if this feature can be used. This feature gives users a lot of different benefits, so it becomes worthwhile to appear in high-end devices. Because this feature has so many benefits, many users want this feature to appear on their device for use, even if it's not Samsung. If users want this feature to appear on their devices, please go to the Always on AMOLED | Edge Lighting app to experience. This application is what gives users the Edge Lighting feature right on their device for users to experience. If you have ever used or are using devices equipped with AMOLED or OLED screens, you will know this feature. This is a feature that makes the screen always light when the screen is turned off, but only lights certain things. But not all devices equipped with this screen are manufacturers integrated this feature for users to use. Users can download this app to keep their screens active, but not all of them are necessary. For example, a clock for users to watch the time without opening the screen or notifications and many other things. Users only need to take the phone out of their pocket to see what time it is now and get notifications sent to their device. This is a feature to notify on devices of Samsung's flagship, and this application is what brings this feature. When the user incubates the phone on the table, when notified, the contours of the device for easy viewing. Users can experience this unique feature right on the user's device; this is an exciting experience that the application brings. Users can go through those light lines to know if they have received a message or something else. Not only is there a default color, but the application also gives users a color palette with all the different colors for users to choose from. Users can select any color that they like to apply to their devices. Users can not only use one color but also can choose different colors so that they can be combined. In addition to colors, the application also has many different effects for users to select and use. The features of the application are designed for devices equipped with AMOLED or OLED screens so they can work best. But that doesn't mean that screens like LCDs don't use this application. This application is compatible with many different devices and with most types of screens available on the market. If the user is using an LCD or IPS device, the application will still work well but only use more battery. Download APK (15.22MB) We replaced some download links to download Moddroid APK. You can download AOAWith a faster download speed. MODDROID app has more complete contents than MODDROID websites. Your Comment (0) Submit comment Technolts Amoled (Package Name: com.technolts.alwaysdisplay.amedscreen.free) is developed by technolts The IT Solution, Pvt. Ltd and the latest version of Always On Display : SUPER AMOLED 3.6 was updated on November 30, 2021. Always On Display : SUPER AMOLED is in the category of Personalization. You can check all apps from the developer of Always On Display : SUPER AMOLED and find 118 alternative apps to Always On Display : SUPER AMOLED on Android. Currently this app is for free. This app can be downloaded on Android 4.4+ on APKFab or Google Play. All APK/XAPK files on APKFab.com are original and 100% safe with fast download. Always on Display is a super Always On Amoled app that display basic information like Mobile Time , Date , Notification , music control and much more on black screen when your mobile Screen is "Off". Keep your mobile screen ON all the time with the Digital clock Display , Analog clock Display , Calendar clock , Emoji clock , Picture Display clock with notification , Date , Time and more and all without having to touch the phone .What's going on your phone, simply take your mobile out of your pocket , just turn your face at mobile screen and enjoy all these feature of Samsung Galaxy S7 , Galaxy S7 edge, Galaxy S8 , Galaxy S9 and Galaxy S9 plus.What's Added- Time Rules which lets you set custom start and end time to increase battery life - Pocket mode which uses proximity sensor to turn off screen when placed in your pocket and increase battery life - Automatic rules which preserves battery life using predefined settings- shortcuts added such as flashlight, home button, Calculator- Adjust screen brightness and Auto BrightnessEdge Lighting:Edge Lighting for any android phone application has an amazing user interface to use and it make your mobile screen totally adorable with attractive lighting. Color effects will run around your screen when incoming calls or new notification arrive.
